LGI eClinibase featured modules

APPOINTMENTS

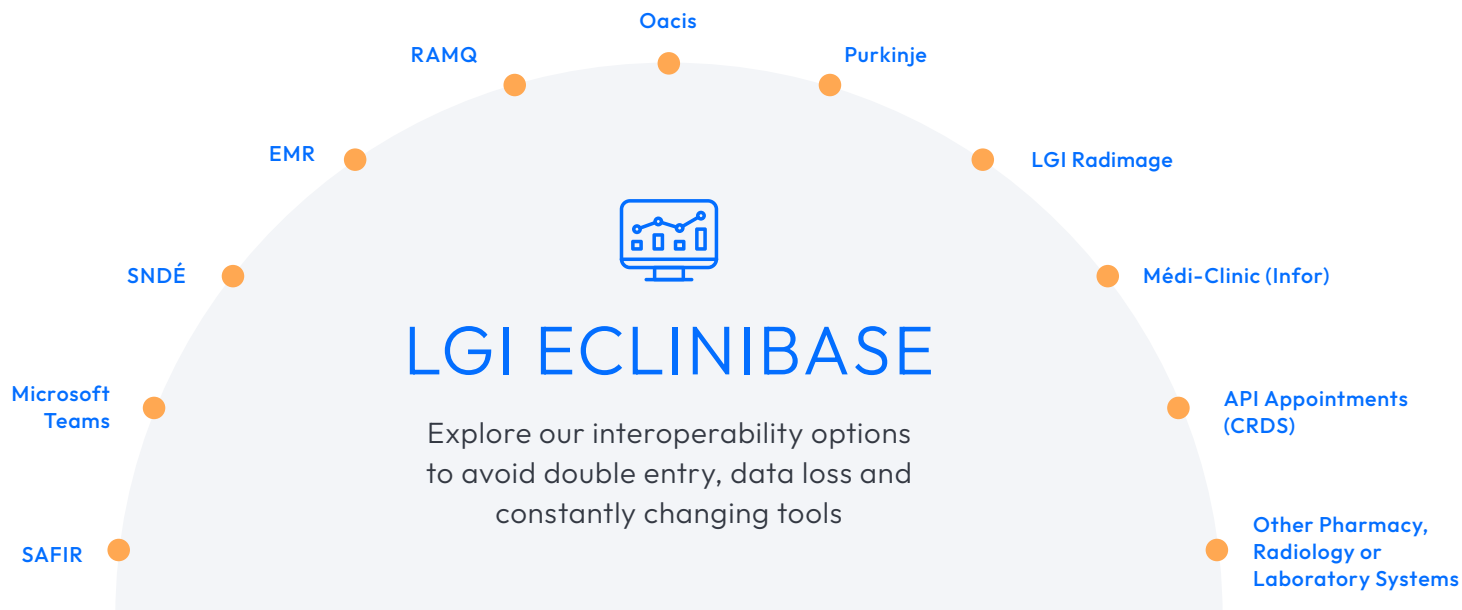

Speed up management of subspecialty appointments with the CRDS and professional services through automated confirmation, multiple appointment scheduling, quotas and overbooking options

EVISIT

Optimize patient management by enabling unit managers to configure wait lists to match desired workflows and giving professionals access to the right information during appointments

REFERRALS

Centralize referrals and requests for consultations and examinations while effectively managing wait lists according to customizable rules

Already using LGI eClinibase?

Request a custom demo and see what additional modules could be deployed in your facility to further simplify the care pathway.
