

LGI SUPPLY CHAIN

Facilitates information processing in healthcare supply management

93% of transactions processed electronically, without human intervention

90% less handling time completing page 415-00*

80% of purchase orders transmitted through the EDI module

LGI Supply Chain (MMS) optimizes your resources by giving you greater control over the healthcare supply chain.

A CLEAR PICTURE OF YOUR RESOURCES

Reducing the number of human interventions associated with transactions and other repetitive tasks saves you time

AUTOMATED PROCUREMENT PROCESS

Consulting data warehouses and analytical dashboards allows for greater visibility on inventory issues, pending orders and budget allocation

RELIABLE SUPPLY CHAIN

Centralizing supply chain information and optimizing order indexing ensure an adequate level of stock reserves

Modules available

Procurement, purchasing and inventory management

Inventory products distribution centre and purchase order cross-docking

NEW! Requisition receipt web

Proceed with the technological upgrade of LGI Supply Chain

The technology upgrade involves upgrading the LGI Financial (FMS) and LGI Supply Chain (MMS) solutions to merge and optimize their databases. The upgrade improves the speed and overall performance of your financial and material management tools and gives you access to new features.

Key benefits of the upgrade

SIMPLIFIED TELEWORK

The solution is accessible remotely and updates are easier to deploy to the client environment.*

INCREASED SPEED AND PERFORMANCE

Merging the databases boosts system performance and speed.

ACCESS TO FUTURE WEB MODULES

The new technology gives access to the Web Budget modules and other future web modules.

ENHANCED USER EXPERIENCE

Users can benefit from more than 180 interface enhancements and new features.

* Via web and non-cloud elements

Request a customized demo of the Web Budget module or learn more about the steps involved in the technology upgrade
