

LGI Workforce Pro

Human resources

Efficient workforce management relies on comprehensive human resources automation — one of six essential components in a turnkey healthcare HRIS solution to streamline operations and empower your teams to deliver exceptional patient care:

Automated scheduling

Payroll integration

Human resources

Talent management

Time and attendance

Employee self-services

Automate any process with easy navigation through to completion.

The HR module in LGI Workforce Pro was designed recognizing that all organizations have processes that are unique to them – one size does not fit all. To ensure maximum flexibility and optimal performance, LGI Workforce Pro uses the concept of configurable folders to document and automate HR activity. You can get started using an existing template that is easily updated, or you can create an HR folder from scratch. Every field you define can be reported on for measurement and metrics analysis.

Control and track any HR process, such as performance management, succession planning, health and safety, labour and employee relations and relocation administration.

Automate and streamline processes to drive efficiency and cost effectiveness.

Eliminate post-it note reminders.

Assign tasks to owners to facilitate accountability.

Replicate and automate unique human resources processes.

Track, report and analyze unlimited processes.

Benefits

- Facilitate continual process improvement
- Streamline internal processes resulting in increased efficiency
- Minimize costly customizations
- Reduce paper waste

Your healthcare challenges. Our proven solutions. **Let's talk.**
