LGI Education

Elevate the complete journey of medical education for learners, residents, fellows, educators, and administrators

70K learners, administrators and health professionals

+160K rotations and placements per year

1M assessments processed annually

LGI Education (MedSIS 3C) is a cloud-based learner assessment platform that provides a roadmap to excellence for healthcare facilities and education institutions

Learners

Pre-med, residents, fellows, doctors, etc.

Frequent, relevant and mobile-friendly feedback

Educators

Faculty, practicum supervisors, preceptors, evaluation committees, etc.

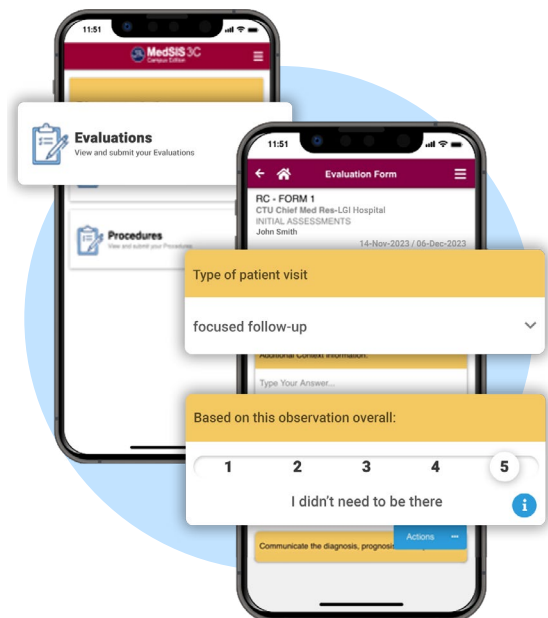

Simplified assessments with customizable forms and templates

Administrators

Supervisors, administrative staff, program directors, deans, associate deans, etc.

Dashboards, charts and graphs for improvement insights

Assist in the educational experience in Faculties of Medicine with a single module and gradually expand to others as your needs evolve, from admission to graduation.

Admission

Process applications, communicate with applicants, and plan interview schedules efficiently to simplify the admissions journey.

Registration

Track requirement statuses and receive timely reminders to keep both your team and learners informed.

Scheduling

Ensure smooth management of training capacity by building your academic and clinical schedules with a drag-and-drop interface.

Assessments

Trigger assessments effortlessly, complete forms accurately, and stay connected with real-time assessments that can be viewed on mobile devices.

- **Dashboards and reporting**

Effortlessly maintain data accuracy with dashboards, charts and graphs for research purposes and improvement insights.

- **Curriculum mapping**

Customize your curriculum with real-time collaboration tools, interactive timelines, maps, and reports.

- **Competency-based medical education**

Build a curriculum that aligns with the competency-based medical education (CBME) framework.
