

LGI SCHEDULING MOBILE APP

Users enjoy total autonomy in managing their schedules to help achieve an optimal work-life balance.

The LGI Scheduling Mobile App integrates with your payroll solution to automate the dispatching of shift offers in compliance with current collective agreements, facilitating schedule changes.

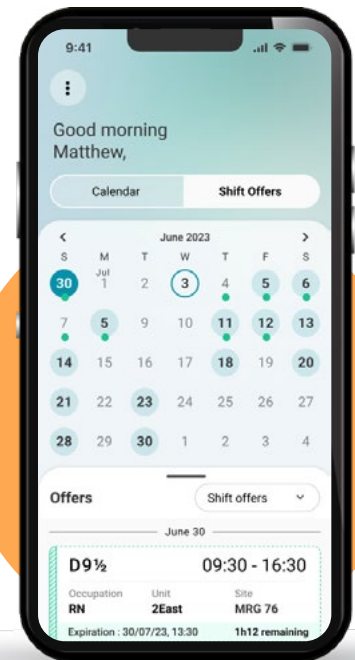

Get quick access to your work schedule.

View hours worked, bonuses and vacations.

Receive shift offers.

Visualize potential schedule changes before making a decision.

Accept or decline a shift offer with a simple sweep to the right or left.

An unfilled shift appears due to absence, leave or vacation.

The scheduler creates a list of employees to contact.

A shift offer is sent via the mobile application to all employees on the list.

The order in which employees are contacted is based on collective agreements and other predefined rules.

Employees can accept or decline the offer with a simple sweep of the finger to the right (accept) or left (decline).

Once the response period has expired, the **scheduler may assign the shift to the employee** with the highest priority among those who have accepted the offer.

The shift assignment is applied in the pay system and a confirmation notice is sent to the employee via the application.
